GENERAL KNOWLEDGE II

No. of Scouts: 4

Equipment: 3 chairs

Scout One (standing): Our last round is an individual round. First question. "How many days of the week start with the letter "T?"" Yes [Name]?

Scout Two: Two. Today and tomorrow is what I think the answer is. Easy.

Scout One: Correct. Your reasoning is incorrect but I'm not marking you on that. Second question. This is a little bit harder. "How many seconds are there in a year?" Yes [Name]? That was quick.

Scout Three: Twelve.

Scout One: Quick but wrong. How did you arrive at twelve?

Scout Three. There's second of January, second of February, second of March...

Scout One: Still wrong. There are 31,536,000 seconds in a year. I would have accepted 30,000,000.

Scout Three: How very generous.

Scout One: Sorry?

Scout Three: Nothing.

Scout One: Last question. This is the hardest of the lot. How many "D"s are there in the song, "Rudolf the Red Nosed Reindeer?" Come on, it's not that difficult. I'll have to hurry you. Quickly. At last! Yes [Name]?

Scout Four: Eight hundred and nineteen.

Scout One: No. And that's almost worth a minus mark. There are four. So how did you get eight hundred and nineteen?

Scout Four: because it goes Da da da da da da daa. Da da da da da da daa. Da da da da da da daa. Da da da da da daa daa.

Scout One: I give up! (Walks offstage.)
